Make Your Bed Admiral William H. McRaven, 2017-04-04 Based on a Navy SEAL's inspiring graduation speech, this #1 New York Times bestseller of powerful life lessons should be read by every leader in America (Wall Street Journal). If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university's slogan, What starts here changes the world, he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long Naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves-and the world-for the better. Admiral McRaven's original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life's darkest moments. Mobile Computing Principles Reza B'Far, 2004-11-01 Written to address technical concerns that mobile developers face regardless of the platform (J2ME, WAP, Windows CE, etc.), this 2005 book explores the differences between mobile and stationary applications and the architectural and software development concepts needed to build a mobile application. Using UML as a tool, Reza B'far guides the developer through the development process, showing how to document the design and

implementation of the application. He focuses on general concepts, while using platforms as examples or as possible tools. After introducing UML, XML and derivative tools necessary for developing mobile software applications, B'far shows how to build user interfaces for mobile applications. He covers location sensitivity, wireless connectivity, mobile agents, data synchronization, security, and push-based technologies, and finally homes in on the practical issues of mobile application development including the development cycle for mobile applications, testing mobile applications, architectural concerns, and a case study.

Climate Politics And The Climate Movement In Australia Verity Burgmann,Hans Baer,2012-08-01 Climate change is the hottest topic of the twenty-first century and the climate movement a significant global social movement. This book examines the broad context of Australian climate politics and the place of the climate movement within it. Acting 'from above' are the most powerful forces—corporations and governments, both Labor and Coalition—with the media framing the issues. Climate movement actors 'in the middle' include the Australian Greens, major environmental and climate organisations, think-tanks, academics, public intellectuals and the union movement. Acting 'from below' are the numerous local climate action groups and various regional and national networks. This lowest level is the primary location of the climate movement; and grassroots mobilisation the source of its vitality. To advocate a safe climate and climate justice, the book ends by offering a vision for an alternative Australia based upon the principles of social equity and environmental sustainability.

Drive Daniel H. Pink,2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Border Security Peter Chambers,2017-09-27 What kind of a world is one in which border security is understood as necessary? How is this transforming the shores of politics? And why does this seem to preclude a horizon of political justice for those affected? *Border Security* responds to these questions through an interdisciplinary exploration of border security,

politics and justice. Drawing empirically on the now notorious case of Australia, the book pursues a range of theoretical perspectives – including Foucault’s work on power, the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster – in order to formulate an account of the thoroughly constructed and political nature of border security. Through this detailed and critical engagement, the book’s analysis elicits a political alternative to border security from within its own logic: thus signaling at least the beginnings of a way out of the cost, cruelty and devaluation of life that characterises the enforced reality of the world of border security.

The Ideal Team Player Patrick M. Lencioni, 2016-04-25 In his classic book, *The Five Dysfunctions of a Team*, Patrick Lencioni laid out a groundbreaking approach for tackling the perilous group behaviors that destroy teamwork. Here he turns his focus to the individual, revealing the three indispensable virtues of an ideal team player. In *The Ideal Team Player*, Lencioni tells the story of Jeff Shanley, a leader desperate to save his uncle’s company by restoring its cultural commitment to teamwork. Jeff must crack the code on the virtues that real team players possess, and then build a culture of hiring and development around those virtues. Beyond the fable, Lencioni presents a practical framework and actionable tools for identifying, hiring, and developing ideal team players. Whether you’re a leader trying to create a culture around teamwork, a staffing professional looking to hire real team players, or a team player wanting to improve yourself, this book will prove to be as useful as it is compelling.

Intertextuality and Prestige Advertising: A discursive-semiotic analysis of Australian TV advertisements Christian Wöller, 2001-11-20 Thesis (M.A.) from the year 2001 in the subject English Language and Literature Studies - Linguistics, grade: 1.7 (A-), LMU Munich (Institute for English Philology), language: English, abstract: Introduction 1.1. Foreword Intertextuality is a term that has often been discussed in the linguistic analysis of literature texts. More recently it has become a popular term in media research, especially the analysis of advertisements. But what about Intersemioticity? Intersemioticity is a term that was coined only recently by Lipka (personal note). Like intertextuality, it deals with the relationship of texts to each other but refers not only to textual and verbal messages but also to non-verbal information such as pictures or sounds. It can simply be seen as a web of references that link the textual, visual and aural elements of a primary message with textual, visual and aural elements from other messages. Even the interaction of semiotic modes within a message marks a form of intertextuality which can be referred to as intra-semioticity. In modern TV advertising, both intra- and intersemioticity play an important role as visual and verbal information continually overlap each other and consequently can no longer be defined as independent referential systems. Prestige is a relatively broad term that, according to the Cambridge Online Dictionary (dictionary.cambridge.org/), is used to refer to the respect and admiration given to someone or something, usually because of a reputation for high quality, success or social influence. In advertising, it is often associated with luxurious goods or prestige items such as expensive cars or watches but also with personal prestige. Celebrated public

characters often advertise for a product, which enhances the value of both the product and sometimes the celebrity. In a more cultural context, prestige refers to the respect and admiration that is given to a cultural group because of its positive values and qualities. In the opinion of most Australians, Australian culture stands for: friendliness, liberal thinking, personal independence, naturalness, openness, good humour, sportsmanship, nature loving and national pride. Advertisers who wish to boost the sales of an Australian product to Australian consumers often address their target group by making references to these highly estimated national characteristics. Mindset Carol S. Dweck, 2007-12-26 From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building

lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

A Universe from Nothing Lawrence Maxwell Krauss, 2013 This is a provocative account of the astounding new answers to the most basic philosophical question: Where did the universe come from and how will it end?

I Had a Black Dog Matthew Johnstone, 2012-03-01 'I Had a Black Dog says with wit, insight, economy and complete understanding what other books take 300 pages to say. Brilliant and indispensable.' - Stephen Fry 'Finally, a book about depression that isn't a prescriptive self-help manual. Johnston's deftly expresses how lonely and isolating depression can be for sufferers. Poignant and humorous in equal measure.' Sunday Times There are many different breeds of Black Dog affecting millions of people from all walks of life. The Black Dog is an equal opportunity mongrel. It was Winston Churchill who popularized the phrase Black Dog to describe the bouts of depression he experienced for much of his life. Matthew Johnstone, a sufferer himself, has written and illustrated this moving and uplifting insight into what it is like to have a Black Dog as a companion and how he learned to tame it and bring it to heel.
