Handbook of Quantifiers in Natural Language Edward Keenan, Denis Paperno, 2012-03-30 Covering a strikingly diverse range of languages from 12 linguistic families, this handbook is based on responses to a questionnaire constructed by the editors. Focusing on the formation, distribution and semantic interpretation of quantificational expressions, the book explores 17 languages including German, Italian, Russian, Mandarin Chinese, Malagasy, Hebrew, Pima, Basque, and more. The language data sets enable detailed crosslinguistic comparison of numerous features. These include semantic classes of quantifiers (generalized existential, generalized universal, proportional, partitive), syntactically complex quantifiers (intensive modification, Boolean compounding, exception phrases) and several others such as quantifier scope ambiguities, quantifier float, and binary quantifiers. Its theory-independent content extends earlier work by Matthewson (2008) and Bach et al. (1995), making this handbook suitable for linguists, semanticists, philosophers of language and logicians alike.

Phonological Word and Grammatical Word Alexandra Y. Aikhenvald, R. M. W. Dixon, Nathan M. White, 2020-11-05 This volume examines the concept of 'word' as a phonological unit and as an item with both meaning and grammatical function. The chapters explore how this concept can be applied to a range of typologically diverse languages, from Lao and Hmong in Southeast Asia to Yidiñ in northern Australia and Murui in the Amazonian jungle.

Contaminants in Terrestrial Environments Otto Fränze, 2012-12-06 Defining ecology as a system-theory oriented synthesis of both earth and life sciences, the book aims at a novel coherent understanding of chemical impact on the lower atmosphere and characteristic types of terrestrial ecosystems. To this end comprehensive flux-analytical and hierarchical modelling approaches were developed and consulted, which include a thorough consideration of the specific physical and geographic boundary conditions of the processes involved. The first part is devoted to fundamentals of environmental chemistry and ecology, while the second deals with the complex atmospheric pathways of anthropogenic chemicals. In the last part, the manifold interactions of these compounds or their metabolites with the soil-vegetation complex of ecosystems are described. Chapters on pollutant impact on materials and a review of chemical fate modelling are included. Thus

scientists and practitioners facing ecological projects may expect to obtain a deeper insight into landscape ecology from the impact point of view owing to the concise presentation of complex mechanisms and the generalized modelling approach.

The Clause Structure of Wolof Harold Torrence, 2013-01-01 This volume investigates the clausal syntax of Wolof, an understudied Atlantic language of Senegal. The goals of the work are descriptive, analytical, and comparative, with a focus on the structure of the left periphery and left peripheral phenomena. The book includes detailed examination of the morpho-syntax of wh-questions, successive cyclicity, subject marking, relative clauses, topic/focus articulation, and complementizer agreement. Novel data from Wolof is used to evaluate and extend theoretical proposals concerning the structure of the Complementizer Phrase (CP) and Tense Phrase (TP). It is argued that Wolof provides evidence for the promotion analysis of relative clauses, an exploded CP and TP, and for analyses that treat relative clauses as composed of a determiner with a CP complement. It is further argued that Wolof has a set of silent wh-expressions and these are compared to superficially similar constructions in colloquial German, Bavarian, Dutch, and Norwegian. The book also presents a

comparison of complementizer agreement across a number of related and unrelated languages. Data from Indo-European (Germanic varieties, French, Irish), Niger-Congo (Atlantic, Bantu, Gur), and Semitic (Arabic) languages put the Wolof phenomena in a larger typological context by showing the range of variation in complementizer agreement systems.
