*Tension on the String...* Mark R. Baker,2012-10-08 There are those among us hunters, who revel in the minimalistic pursuit of wild animals, using the most rudimentary of tools, and seeking out the whole of the experience, up close and personal, and as intimately involved with our prey as we possibly can be. This experience rewards us with the greatest sense of accomplishment and challenge, and connects us directly with our forefathers and ancient pasts. It, too, cements our admiration and awe for the wild places and animals we share this journey with along the way. Classic Bowhunting is our vehicle in this journey... a completely different pathway of regression, rather than the technological domination over mother nature and our inadequacies in seeking and taking our prey. This acceptance of the challenges, enhances our immersion and participation into the wild and natural world, and replenishes our spirit. Enjoy adventures with real stick and string appeal, in some of the wildest country in North America.

Kwakiutl String Figures Julia P. Averkieva, 1992-06-01 Of the games people play, string figures afford nearly universal amusement, appearing in more cultures than any other. But although over 2,000 individual patterns have been recorded world-wide since 1888, when anthropologist Franz Boas first described a pair of Eskimo cat's cradles, very few studies have explored North American Indian string figures. This intriguing volume publishes for the first time 102 string figures and 10 string tricks collected among the Kwakiutl Indians by Julia Averkieva, a young visiting Soviet scholar who accompanied Boas on his 1930 expedition to Vancouver Island. When she returned to Leningrad, Averkieva left her unpublished monograph with Boas, whose heirs eventually sent it to the American Museum of Natural History in New York. Averkieva's study represents the most comprehensive Native American string collection ever assembled from a single tribe. In addition to characterizing the social conditions that prompted string figure making among the Kwakiutl during the time of her field study, Averkieva noted step-by-step instructions for each figure and transcribed traditional accompanying chants. In editing and expanding Averkieva's manuscript, Mark Sherman addresses string figure enthusiasts as well as cultural anthropologists. Sherman includes in his introduction a complete description of basic openings and string figure moves. For each Kwakiutl figure he has prepared clear illustrations based on Averkieva's original photographs and pencil sketches. In addition he has tested each figure for workability, clarifying instructions where necessary and recasting them in Rivers and Haddon's standard terminology. Sherman's analysis of figure titles suggests that many aspects of Kwakiutl material culture

and belief are preserved in string. In examining the ethnological value of the collection, he discusses the implications of observed similarities between Eskimo and Kwakiutl string figures. He also updates Averkieva's preliminary distribution data, interspersing the figure descriptions with references to related and identical figures from other cultures. Each analysis is keyed to an illustrated cross index. Kwakiutl String Figures will interest students of comparative cultures and will delight all who have time (and string) on their hands.
