Fundamentals of Music Processing Meinard Müller, 2021-04-09 The textbook provides both profound technological knowledge and a comprehensive treatment of essential topics in music processing and music information retrieval (MIR). Including numerous examples, figures, and exercises, this book is suited for students, lecturers, and researchers working in

audio engineering, signal processing, computer science, digital humanities, and musicology. The book consists of eight chapters. The first two cover foundations of music representations and the Fourier transform—concepts used throughout the book. Each of the subsequent chapters starts with a general description of a concrete music processing task and then discusses—in a mathematically rigorous way—essential techniques and algorithms applicable to a wide range of analysis, classification, and retrieval problems. By mixing theory and practice, the book’s goal is to offer detailed technological insights and a deep understanding of music processing applications. As a substantial extension, the textbook’s second edition introduces the FMP (fundamentals of music processing) notebooks, which provide additional audio-visual material and Python code examples that implement all computational approaches step by step. Using Jupyter notebooks and open-source web applications, the FMP notebooks yield an interactive framework that allows students to experiment with their music examples, explore the effect of parameter settings, and understand the computed results by suitable visualizations and sonifications. The FMP notebooks are available from the author’s institutional web page at the International Audio Laboratories Erlangen.

Tour Tempo John Novosel, John Garrity, 2004-04-27 What swing secret is shared by nearly all golf greats – from Ben Hogan to Tiger Woods? John Novosel’s revolutionary breakthrough has cracked the “genetic code” of the golf swing – Tour Tempo. Tiger Woods...Greg Norman...Ben Hogan. What secret do these and nearly all golf legends share? Identical swing tempo. John Novosel has cracked the “genetic code” of the golf swing – and has derived a simple and effective system to teach it to golfers of all levels, from tour players to weekend warriors. This book includes a revolutionary instructional CD, featuring videos that illustrate exactly how to learn the tempo secrets of the tour pros, and a calibrated soundtrack that you can use while practicing at a driving range or in your living room. Regardless of style or form, the winning tempo was always the same – Tour Tempo. In this breakthrough book, Novosel and Sports Illustrated senior writer John Garrity explain exactly how to achieve Tour Tempo. Stolen Time Richard Hudson,1994 Tracing the complex history of tempo rubato, this book identifies and traces the development of two main types of rubato: an earlier one in which note values in a melody are altered while the accompaniment keeps strict time, and a later, more familiar one in which the tempo of the entire musical substance fluctuates. In the course of his narrative, Hudson ranges widely over western music, from Gregorian Chant to Chopin, from C.P.E. Bach to jazz, quoting extensively from the writings of theorists, composers, and performers. In so doing he not only suggests new ways of approaching the rubato in the music of nineteenth-century composers like Chopin and Liszt, where we expect to encounter the term, but also illuminates the music of earlier and later periods, revealing its use even in the music of that most metronomic of composers, Stravinsky.
